## Kyoto - 2018 Mystery Quilt - Clue 7

### Step 1: Add E/F and Er/Fr Units to Star Points

Referring to the illustration below, sew an E/F unit made in Clue 1 to the right side of a large point, matching the dots. Next, sew an Er/Fr unit made in Clue 1 to the left side of the large point, matching the dots. Repeat to make a total of six.

### Step 2: Determine Final Design

For this step, it is important to watch this clue's video. Jinny demonstrates the myriad designs that are possible simply by choosing:

- the rotation of the foundation units
- the final placement of the regular and reversed foundation units
- the rotation of the wedges

Consider taking a picture of your final choice for reference when sewing!

### Step 3: Make the Wedges

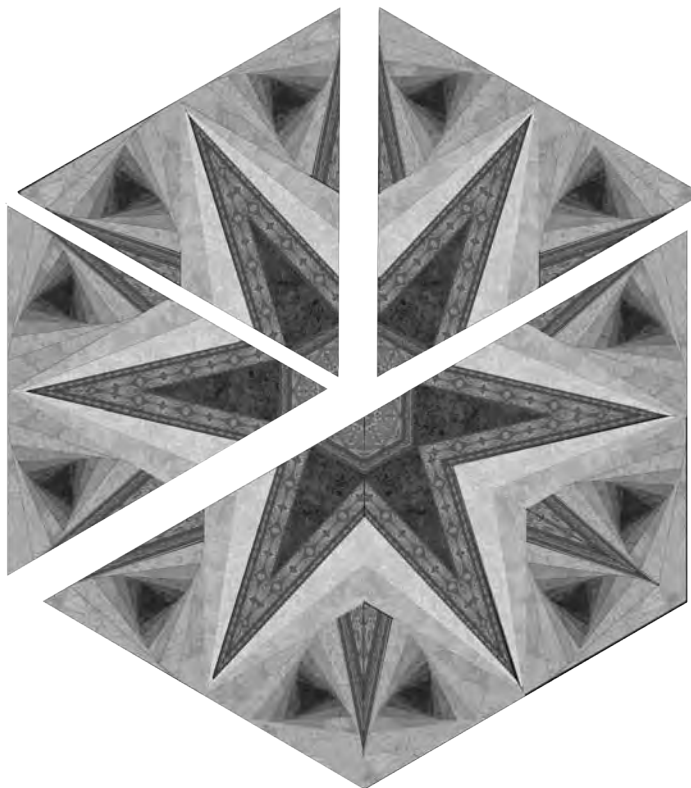

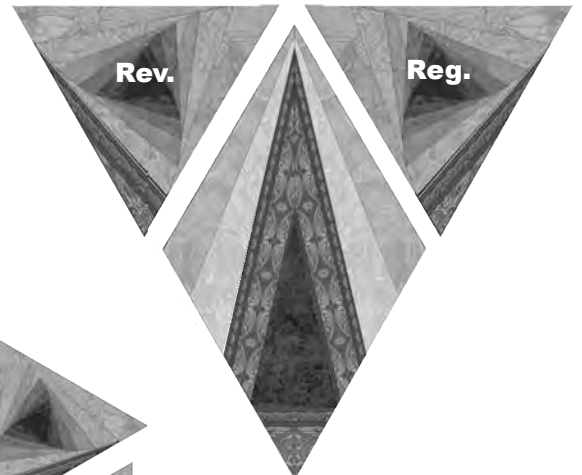

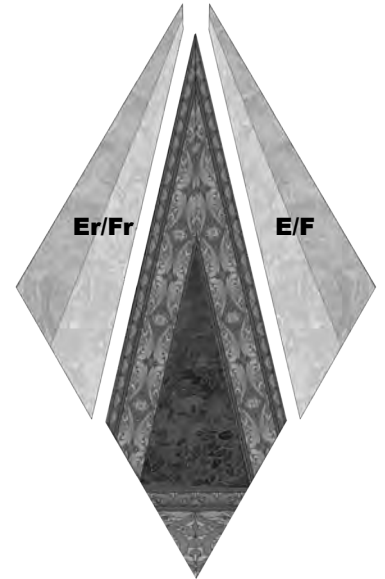

Once you have finalized your design, sew a regular and a reversed foundation to the unit made in Step 1, matching the dots. (Note that because of your design choices, your unit may not look exactly like the illustration, right.)

Repeat to make six identical wedges.

### Step 4: Assemble the Star

Sew the six wedges together into your final design.

Take care to match and pin the seam intersection dots and the border print fabric design.

#### Video Lesson

Jinny demonstrates the sewing techniques from this month's clue at:
