## Month 7

### Step 1: Sew Together the Compass Units

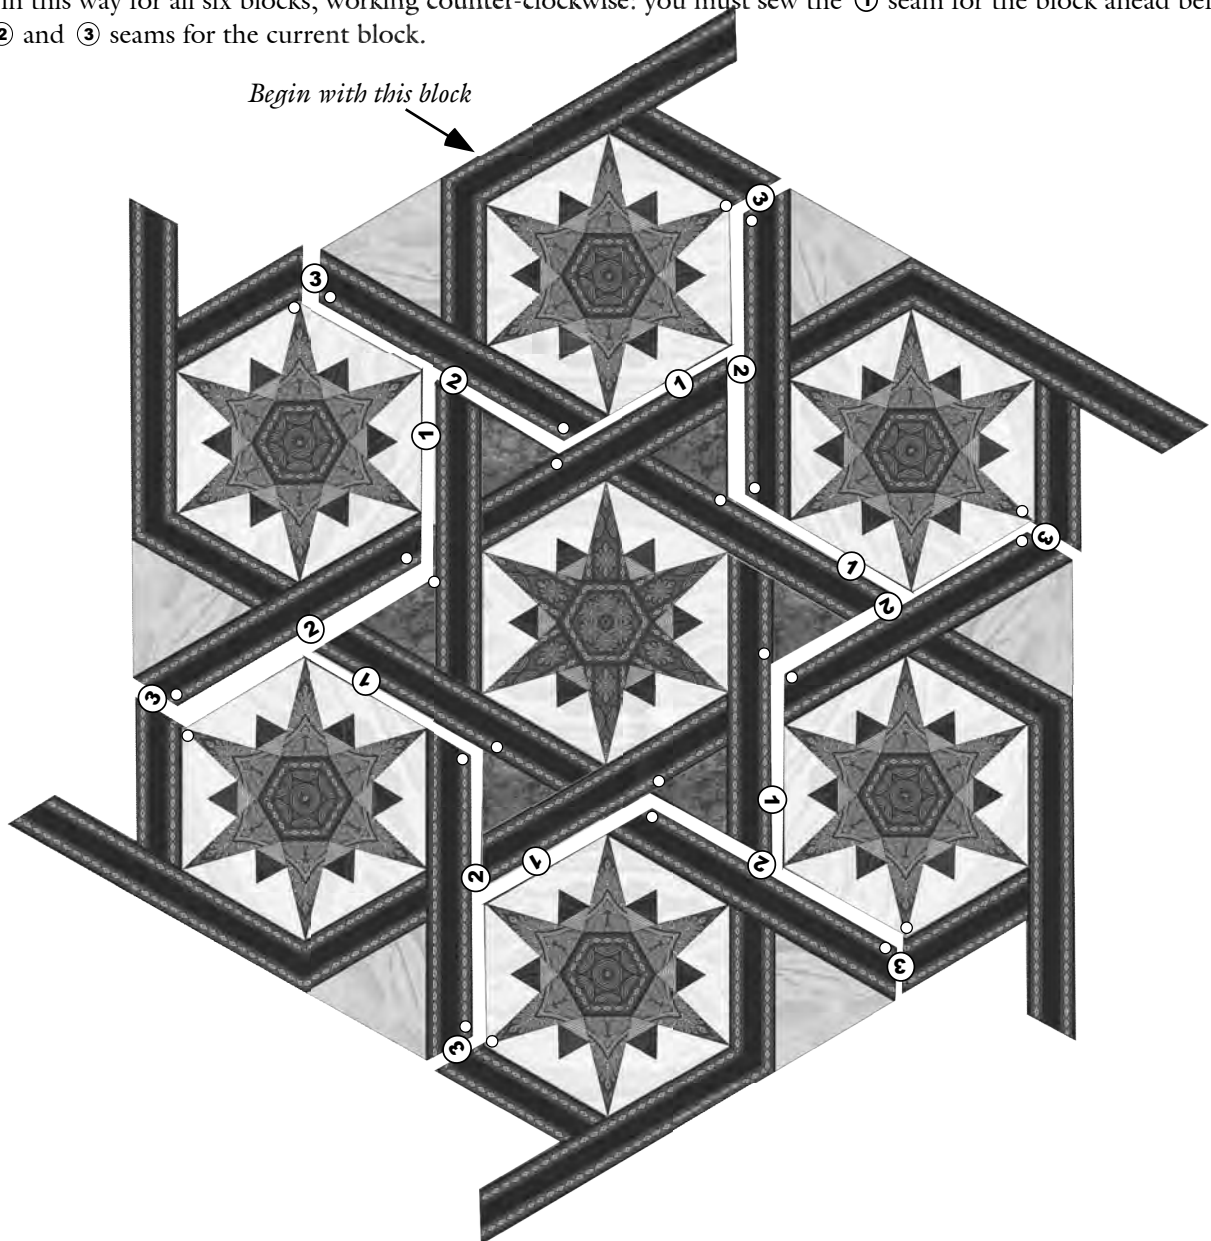

On a design surface, arrange the compass blocks around the center compass unit as illustrated, shifting them around until you are satisfied with the block placement.

*Piecing Order Note - The 1-2-3 piecing order described below can be perfectly effective. However, if you find that you are having difficulty matching the fabric designs for seam ③, you may wish to sew that seam first, then sew seams ② and ①.*

a) Starting with the block at the top, sew the seam marked ①, starting/stopping at the dot shown. **Working counter-clockwise**, sew the same ① seam for the next block.

b) Next, again starting with the top block, sew the seams marked ② and then ③ using an inset seam.

c) Continue in this way for all six blocks, working counter-clockwise: you must sew the ① seam for the block ahead before sewing the ② and ③ seams for the current block.

#### Video Lesson

Jinny demonstrates some of the techniques used this month at:
